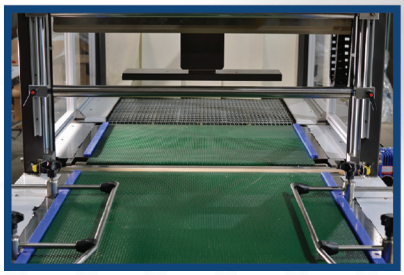
U.S. PACKAGING & WRAPPING LLC

AUTO SHRINK BUNDLER



U.S. Packaging & Wrapping is happy to offer the inline SFE800 Auto Shrink Bundler. Capable of packaging up to 15 products per minute, the SFE800 utilizes two rolls of single-wound bundling film to wrap a variety of items efficiently. Perfect for case packaging and bundling multiple heavy products together, the SFE800 seal cases up to twenty-eight inches wide. Each bundler requires three-phase electrical power and comes with a bare wire electrical hook up.

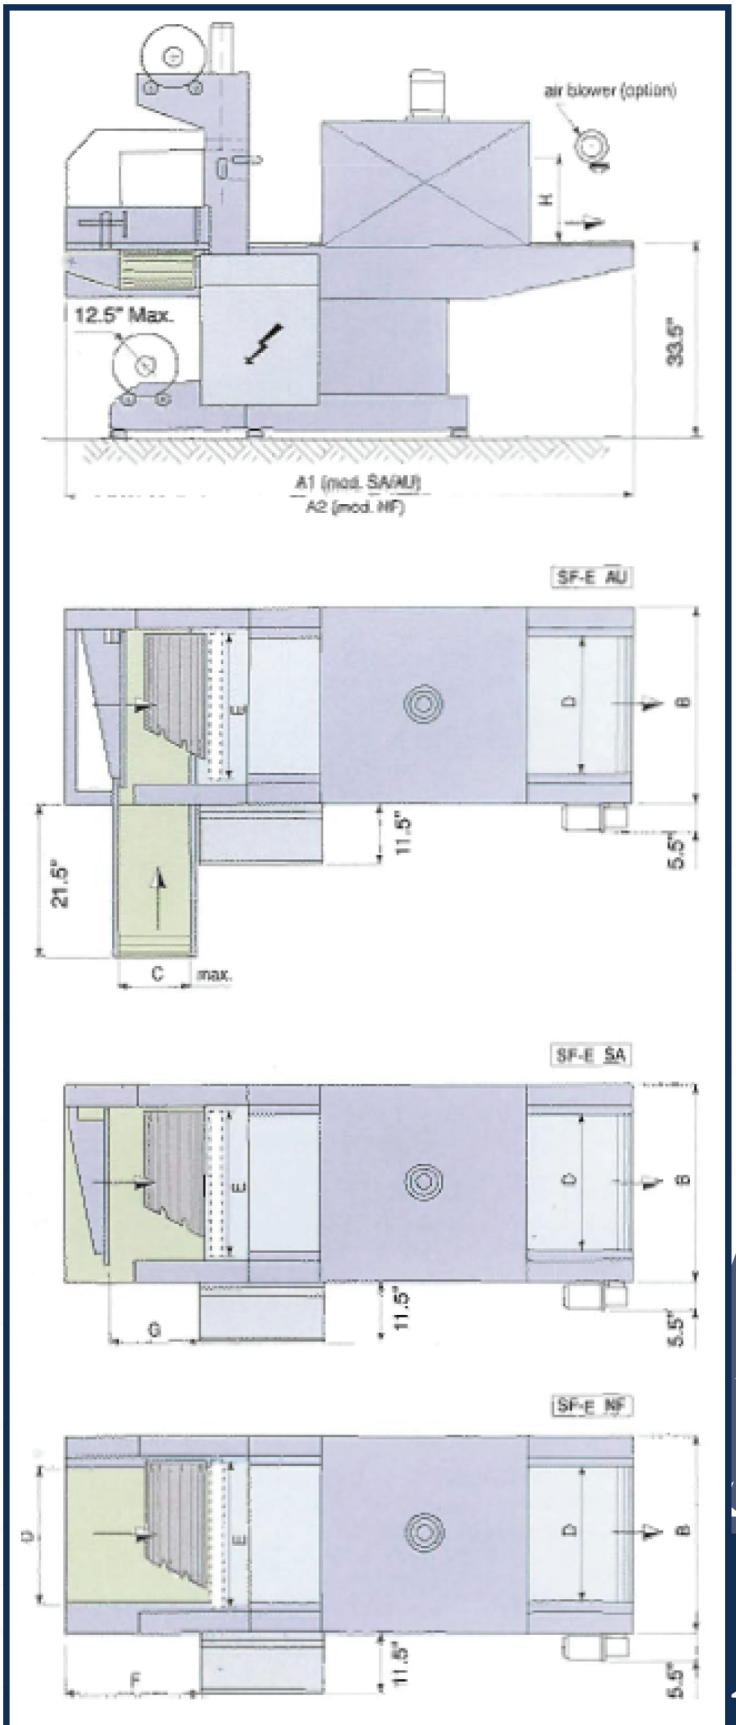
Average Power Use (KW)	4/6	8/12	10/15	13/18



The fully auto 800NFE shrink bundler is a one-piece combo shrink bundling sealer and tunnel. The inline design makes integration into existing lines easy. Products are auto fed into the sealing area. After the seal is finished, cases move into the tunnel via a conveyor for shrinking.

The quick set Delta PLC makes machine adjustments fast and efficient. The wide 29.5-inch sealing bar is capable of sealing boxes, cases, and other large items. The tunnel can fit products up to 16 inches tall.
