- Holds up to 200 lbs. of product
- 3" deep table top

WARRANTY 2 YEAR WARRANTY

Production Line Efficiency

If you're looking for a reliable and convenient way to handle smaller packaged and shrink wrapped products as they leave your machine, consider using the TL-36LS Lazy Susan Product Accumulating Turntable. This particular model is 36" in diameter and can be set up to turn at a speed of Oto 12 rounds per minute. This is a nice alternative to a conveyor, where smaller items would normally fall through the cracks. The TL-36LS can be plugged into any standard 110-volt outlet. The accumulator table sits on top of high-quality bearing rollers. The adjustable leveling bolts allow you to match any conveyor line height. The spinning movement is smooth and even.

Options:

* Also available in *stainless steel*
* Turntables available in 36'; 48" or 60" diameter.

Place the TL-36LS at the end of anv production line or shrink tunnel to catch finished products.
