

AUTO SIDESEAL MACHINE

High Speed Shrink Wrap Machine for a wide variety of applications

Model **INT-20**

SKU	Size	Price	Weight
TL-INT-20	73"x49"x67"	\$49900.00	1500 lbs

The INT-20 automatic side seal machine is capable of sealing products up to 20 feet long! The continuous coated sealing wheel can seal up to thirty-five packages per minute. The industrial strength coating keeps the wheel sealing for years. The easy-touch 7" Delta PLC screen makes product adjustments quick and easy. The machine memory holds 12 preset product sizes. Press the product number needed, and the machine automatically adjusts to accommodate the item running. The product counter easily keeps track of product runs. A self-diagnostic touchscreen will show users any issues the machine may have. The self-contained scrap wheel removal can be quickly and easily be changed as needed.

All automatic side-seal machines come with on-site setup and training — **Call 1-800-441-5090 for product testing today.**

See the machine details for air requirements and more.
